

AI-Based Candidate Screening System

Candidate Information

Candidate Name

Chandan Soren

Position Applying For

Data Science

Interview Responses

Can you explain the difference between supervised and unsupervised learning, and provide an example of each?

You are given a large dataset with missing values and noise. How would you preprocess the data for training a machine learning model?

Tell us about a project you worked on that involved using deep learning. What challenges did you face, and how did you overcome them?

How would you explain the concept of reinforcement learning to someone without a technical background?

Describe a time when you had to collaborate with a team under a tight deadline. How did you handle it?
